**6-STAGE FILTRATION SYSTEM**  
SETTING NEW STANDARDS

**STEP 1**

SEDIMENT FILTER

Eliminates impurities like rust, deposits, and particles.

**STEP 2**

PRE-CARBON FILTER

Primary absorption removes odours and organic substances.

**STEP 3-5**

NATURAL FILTER

Secondary absorption and mineral eruption.  
Mild-alkaline water promotes a healthy pH balance for the body.  
Abundant in Hydrogen to protect the body from Reactive Oxygen Species (ROS).

**STEP 6**

NANO POSITIVE FILTER

Eliminates 99.99% of bacteria and viruses.  
Removes harmful substances, especially heavy metals, algae, fungi, while preserving the good minerals.  
The electric collector of positive charge absorbs harmful substances with a negative charge.

**FILTER REPLACEMENT SCHEDULE**
